

## Agenda item 6

For information

### Interaction Partnership; 12 August 2008

#### Interaction Partnership Action Plan

##### Purpose of Paper

This paper sets out a framework for partnership working across all of the partnership's themes; Community Safety, Environment and Housing, Health, Children and Young People, Employment and Incomes and Community Development. The paper seeks to capture all the services and activities that are currently being delivered in the 2 wards, or are in the pipeline for development, that will directly contribute to the **thematic objectives set in the Interaction Partnership Strategy, 2008-10**. Please note that a separate action plan will be developed for the theme of *Revitalising Clacton Town Centre*.

In Appendix 1, a template has been devised to identify where and how the Partnership will source the key performance information data to **achieve the thematic targets set in the strategy**. It is important to note that there are a significant number of organisations who are delivering services or activities in the 2 wards that are not directly contributing to targets set in the strategy.
