REQUEST

I am carrying out some research on behalf of NHS England into Community Alarm provision (the basic alarm pendant) within Local Authorities – please could you let me know the number of connections (clients) you currently provide this service to across the Tendring area, split by number of dispersed and hard-wired (sheltered housing) if possible please?

RESPONSE

We currently have circa 2700 Careline clients of which approximately 300 are hard-wired in Sheltered Housing. The remainder are dispersed.
