

FOI 205/2016

REQUEST

I work for the Safer Essex Roads Partnership and am in the process of collecting the annual deer collision information for the County to help develop awareness campaigns.

As these are not required to be reported to the police we have very few records of collisions however I do find that deer collected at the side of the road by District/ Borough council waste management teams give a truer figure of what is happening on the roads.

Would I be able have any data or figures you have regarding deer collected by the roadside for 2015 – 16.

RESPONSE

There have been 13 deer collisions between the 1st April 2015 – 31st March 2016.
