

FOI 210/2016

REQUEST

I wish to request the following information:

- an example of the council's risk assessment on a town/ city centre bin lorry route, the hazard identification document associated with that route, both one currently held, and one current on December 22 2014.
- a summary of hazards for bin lorry route, both one currently held, and one current on December 22, 2014
- The generic risk assessment for bin lorries/ waste management, both one currently held and one current on December 22, 2014.

It may be that there is no difference between the documents currently used and those in use on December 22, 2014. If this is the case, please state this in the reply.

I think my request is asking for the correctly named documents but I understand these can be called different things by different councils. Please contact me at the earliest opportunity if this is unclear and I will be happy to clarify this.

I would appreciate a response at your earliest opportunity and at any rate within the 20 days set down by law which would take us to

I would assume they are firmly within the public domain especially considering the tragic accident in George Square last year, but please let me know if I can help further.

RESPONSE

We are unable to provide this information, as it is not held by ourselves, but by our contractors Veolia. They can be contacted at:

Veolia Environmental Services (UK) plc
Oakwood Business Park
Fowler Road
Clacton-on-Sea
Essex
